

special pieces

SMALL/BIG/SASSO

INTEGRATION for PLUS DRY LAYING:

Geopietra® (+10/20% of material due to the lack of joint) + GeoFit® + GeoColl®

INTEGRATION for PLUS LAYING WITH JOINTS:

Geopietra® + about 20% of the pieces of GeoFit® BIG and/or SASSO calculated for dry installation Plus, in the indicated shades. SMALL pieces excluded

For dry laying the chosen Geopietra® model must be always increased by approximately 10/20 %, from this increased quantity the total area of GeoFit® pieces calculated will be subtracted. (See the example on the opposite page).

In the table we suggest the formula for Plus dry laying, it is expressed in number of needed pieces for sqm, in order to get the best mixing result between GeoFit® inserts and Geopietra® models.

GeoFit® SMALL is added in every Plus dry composition despite the chosen model. The percentage of SMALL varies according to the chosen stone: Higher in long and fluted chips, lower in rounded and irregular models.

GeoFit® SMALL in the Ledge Stone profile is matched with BIG pieces, in Opus incertum with SASSO and, in Square and Spontaneous profiles with both types. In dry laying mix the BLACK or BROWN powder dye with Geocoll® glue in order to avoid the finishing touch-up (in dark shade models).

In Plus jointed installations the situation changes and the adoption of SMALL is not recommended: due to its reduced dimensions the grouting would make its presence vain.

The consumption of BIG and SASSO would be roughly the 20% of what calculated in the table for Plus dry layings.

GeoFit / type, quantity of pieces ~ and colour per m² by model.

GEOFIT SMALL		n°pcs ~	Kg
MINIMUM ORDER: full box			
GEOFIT P	33,00 €/box	50	3,00
GEOFIT	50,40 €/box	100	6,00

These are not expressed in areas covered due to their small dimensions. When placing the order mark the colour chosen: BT / BR / MT / GT / GP.

GEOFIT BIG		n°pcs ~	Kg
MINIMUM ORDER: full box			
GEOFIT BIG P	33,00 €/box	15	3,00
GEOFIT BIG	50,40 €/box	50	9,00

When placing the order mark the colour chosen: BM / B / G / M

BIG 1 Box contains ~ 15 pcs
0,08 sqm ~ area covered by a dry-stack installation.
0,12 sqm ~ area covered by an installation with joints.

BIG 1 Box contains ~ 50 pcs
0,29 sqm ~ area covered by a dry-stack installation.
0,41 sqm ~ area covered by an installation with joints.

GEOFIT SASSO		n°pcs ~	Kg
MINIMUM ORDER: full box			
GEOFIT SAS P	33,00 €/box	25	4,00
GEOFIT SAS	50,40 €/box	70	9,00

When placing the order mark the colour chosen: BM / B / G / M

SASSO 1 Box contains ~ 25 pcs
0,06 sqm ~ area covered with a dry-stack installation.
0,09 sqm ~ area covered by an installation with joints.

SASSO 1 Box contains ~ 70 pcs
0,18 sqm ~ area covered by a dry-stack installation.
0,26 sqm ~ area covered by an installation with joints.

Example calculation for wall 70 m² with the VERSILIA P86 murogeopietra plus model:

For dry-stack installation, consider a 10-20% increase in material depending on the model when ordering, to compensate for the lack of a joint. **The total calculated Geofit area should then be deducted from this increased value.**

Example of Geofit calculation

The table shows the following is required per m²:

VERSILIA P86	SMALL	BIG	SASSO
	10 / BR	3 / G	4 / G

- + SMALL 10 pcs / colour BR Bianco Reale
- + BIG 3 pcs / colour G Grigio
- + SASSO 4 pcs / colour G Grigio

Calculation is as follows:

SMALL 10 pcs x 70 (sqm) = 700 pcs (SMALL ~100 pcs/box)
700 pcs ÷ 100 pcs = 7 boxes of colour BR
1 box of GeoFit SMALL does not cover any relevant area since it is used to fill the gaps between the stones.

BIG 3 pcs x 70 (sqm) = 210 pcs (BIG ~50 pcs/box)
210 pz ÷ 50 pcs = 4 boxes of colour G

1 box of GeoFit BIG covers an area of ~ 0,29 sqm.
0,29 sqm x 4 (Nr of boxes) = 1,16 sqm to be deducted from the order for the flats, model VERSILIA P86, already increased of the necessary % amount due to the dry-stack installation.

SASSO 4 pcs x 70 (sqm) = 270 pcs (SASSO ~70 pcs/box)
270 pcs ÷ 70 pcs = 4 boxes in colour G

1 box of GeoFit SASSO covers an area of ~ 0,18 sqm
0,18 sqm x 4 (Nr of boxes) = 0,72 sqm to be deducted from the order for the flats, model VERSILIA P86, already increased of the necessary % amount due to the dry-stack installation.
