

plus

murogeopietra®

It is called **plus** the new solution
geopietra® + GeoFit® for a renewed installation technique,
both dry and with joints.

To achieve an optimal result, **the quantity** of **geopietra®** material to use **varies** based on
the chosen **installation technique**:

DRY LAYING PLUS:

+10/20% of **geopietra®** material
due to the lack of joints
+GeoFit®
according to the table on pages 2/3

SEMI-DRY LAYING PLUS:

+ 5/10% of **geopietra®** material
for a tight joint
+ GeoFit®
according to the table on pages 2/3

LAYING WITH JOINTS PLUS:

geopietra® + GeoFit®
according to the table on pages 2/3

Dry laying: it is recommended to **increase** the order quantity of the chosen model by **10-20%** to compensate for the absence of joints. The total area occupied by the **GeoFit®** pieces (see example) will be then subtracted from this increased quantity.

Dry laying plus, the table indicates the formula with the necessary **number GeoFit® pieces per square meter**, to achieve a perfect balance between inserts and **geopietra®** models.

Semi-dry laying: In this case, the necessary increase is lower, between **5% and 10%**, always subtracting the area of the **GeoFit®** pieces.

Semi-dry laying plus, it is necessary to consider **50%** of the calculated **GeoFit®** for the dry laying Plus.

Laying with joints plus, consumption will be lower, equal to about **20%** of that indicated by the table for dry laying plus.

Example of GeoFit® material calculation for murogeopietra® dry laying plus

Wall of 70 m² NEW CAMUNA P05-G BR model:

for **dry laying** of the model consider, during the order phase, **an increase in material ranging from 10% to 20%** to compensate the lack of joints. **The total calculated GeoFit® area will be then subtracted from this increased quantity.**

Example of GeoFit® integration calculation

The table shows the number of pieces needed per square meter of the model:

NEW CAMUNA P05-G BR PLUS

- + **SMALL 8 pcs / colour BR Bianco Reale**
- + **BIG 4 pcs / colour B Bianco**
- + **SASSO 4 pcs / colour B Bianco**

SMALL	BIG	SASSO
8 / BR	4 / B	4 / B

The calculation is as follows:

SMALL 8 pcs x 70 (m²) = 560 pcs (SMALL ~ **100 pcs** / box)
560 pcs ÷ 100 pcs = 6 boxes colour BR

1 box of GeoFit® SMALL doesn't cover a significant area as it is intended to fill the gaps between the stones.

BIG 4 pcs x 70 (m²) = 280 pcs (BIG ~ **50 pcs** / box)
280 pcs ÷ 50 pcs = 6 boxes colour B

1 box of GeoFit® BIG covers an area of ~ 0,29 m²
0,29 m² x 6 (n° boxes) = 1,74 m²

1,74 m² to be deducted from the flat pieces order, NEW CAMUNA P05-G BR model, already increased by the % for dry laying.

SASSO 4 pcs x 70 (m²) = 280 pcs (SASSO ~ **70 pcs** / box)
280 pcs ÷ 70 pcs = 4 scatole colore B

1 box of GeoFit® SASSO covers an area of ~ 0,18 m²
0,18 m² x 4 (n° boxes) = 0,72 m²

0,72 m² to be deducted from the flat pieces order, NEW CAMUNA P05-G BR model, already increased by the % for dry laying.

Dry laying plus / GeoFit® INTEGRATION

Type, colour and quantity of pieces per model per square meter.

Semi-dry laying plus: consider about **50%** of the calculated **GeoFit®** for the **dry laying plus**.
Laying with joints plus: consider about **20%** of the calculated **GeoFit®** for the **dry laying plus**.
